UNIVERSITY OF WASHINGTON 2027-2029 CONTRACT HIGHLIGHTS

As you all know, the budget deficit continues to grow, and compensation discussions were incredibly difficult as a result. Despite the state being in a financial crisis and the University coming to the table and fighting us on every single word we proposed, the contract secures the following:

- Improved long-term earning power for all employees and financial relief during this contract period for members at the top step (CEGP steps become regular, AUTOMATIC, annual salary adjustment steps.)
- Defended and secured over \$348.5 million in new funding to protect the current healthcare cost share and fought off increases proposed by management.
- Weekend Shift Premium increased to \$2.50
- Improved leave policy for immigration enforcement actions
- Improved language around union representation
- And more...
